SUMMARY

Business Analyst with 4+ years in automotive manufacturing, combining process analysis, data and hands-on system delivery. Led PowerSync from AS-IS mapping and requirements through UAT, rollout and KPI monitoring, connecting dealer, production and after-sales processes. Earlier EV electrical development and government type approval work provide an engineering foundation.

EXPERIENCE

Marketing Research Analyst, 3W Division, PT Dharma Polimetal Tbk

2026 – Present

PowerSync: business analysis and digital transformation

- Led business analysis and delivery of PowerSync, connecting dealer orders, production, delivery and after-sales workflows in Laravel.
- Mapped AS-IS/TO-BE processes from operational forms and maintained traceability for 16 requirements through SRS, UAT and evidence.
- Coordinated workflow requirements, permissions and rollout; monitored adoption and KPIs weekly after go-live.
- Designed frame and engine number controls using format checks, normalized duplicate detection and photo validation; the reviewed sample had 0 mismatches across 217 planned-versus-stamped pairs.
- Connected order, production, delivery and customer records; replaced paper and Excel forms with traceable approval workflows.

Website and digital growth

- Initiated an in-house website rebuild (Jul 2026), addressed assessment findings and implemented CI security scanning.
- Implemented Google Tag Manager, GA4 and Search Console; managed the domain migration with 85 redirects and mapped campaign-to-dealer handoffs for a human-approved AI follow-up design.

Electrical Design Engineer, 3W R&D, PT Dharma Polimetal Tbk

Dec 2021 – 2026

EV product development

- Prepared the test package and coordinated government vehicle type approval for the PowerAce TRIEX electric three-wheeler, obtaining the type approval certificate (SUT) in Sep 2023.
- Designed the mass-production EV wiring harness in Jul 2024 and revised it in 2025.
- Planned road validation using gradient profiles and coordinated slope and water testing.

Market analysis alongside engineering

Concurrent cross-functional assignment from 2024

- Developed the Strategic Renewal proposal (Sep–Dec 2024), using two market-sizing scenarios with stated assumptions to recommend regional focus, dealer tiers and a central data platform.
- Built a 14-source data register, regional analysis and Power BI dashboards; proposed a 12-process Power Platform pilot and prototyped PowerSync in Jan 2025.

SKILLS

- **Business analysis:** requirements and traceability, process mapping (AS-IS/TO-BE, BPMN 2.0), UAT, KPI reporting, adoption tracking
- **Data:** Power BI, Excel, SQL/MySQL, Power Apps, public-data collection, market sizing models
- **Digital and AI:** Laravel, Next.js, GA4, Google Tag Manager, Search Console, Meta Ads, OWASP ZAP, CI security scanning, AI-assisted development (Claude Code)
- **Engineering:** EV electrical systems, wiring harness design, motor controller commissioning, vehicle type approval (SUT)

EDUCATION

Diploma III (D3) Mechatronics Engineering, Politeknik Manufaktur Bandung, Indonesia

Google Data Analytics Professional Certificate, Google Career Certificates, 2024
