

Reyza Agung Gunawan

Business Analyst · Digital Transformation · EV electrical R&D background

Cikarang, Bekasi, Indonesia · reyzacomm@gmail.com · linkedin.com/in/reyzaag · github.com/Reyzasagara · reyzasagara.github.io/nicetomeetyou

SUMMARY

Business analyst with 4+ years at PT Dharma Polimetal, moving from EV electrical R&D into market analysis and cross-functional digitalization. Led analysis and delivery of PowerSync, a dealer-to-factory platform used by 15 of 22 active dealers and holding 4,818 unit records. Initiated moving the company website in-house and rebuilt it with security, analytics and SEO in place.

EXPERIENCE

Marketing Research Analyst, 3W Division, PT Dharma Polimetal Tbk

2026 – Present

PowerSync: dealer, production and after-sales digitalization

- Led business analysis and delivery of PowerSync, a Laravel platform covering retail steps SAP did not handle; by Sep 2026 it held 141 POs (1,685 units), 4,818 unit records, 442 faktur requests and 780 QC inspections.
- Reached 68.2% dealer adoption (15 of 22 dealers) in May–Jun 2026; 55 of 73 accounts active in the last three months.
- Replaced paper and Excel forms for POs, faktur requests, free-service coupons, warranty claims, PDI checks and production reports; one Sales Admin now handles the full faktur workload, including peaks of 60–68 requests a day.
- Designed layered engine and frame number controls (format checks, normalised duplicate detection and photo validation), cutting off-format numbers from 101 to 25, with 0 mismatches across 217 planned-vs-stamped pairs.
- Built unit traceability from PO to production, delivery and customer: 99.9% of PowerSync-ordered units link to a PO; 95% of sold units link to a customer.
- Mapped AS-IS processes from real forms, kept a requirements traceability matrix (16 requirements → SRS → UAT) and ran weekly post-go-live KPI reporting.

Website security and digital growth

- Initiated moving the vendor-built company website in-house (Jul 2026); audited it (OWASP ZAP: 2 High, 3 Medium) and rebuilt it on Next.js and a Laravel API with CI security scanning, raising the self-assessed security score from 28 to 78/100.
- Set up Google Tag Manager, GA4 events and Search Console; restored search traffic after the domain move with 85 redirects.
- Ran a click-to-WhatsApp campaign: 344 conversations for IDR 1.44 million (about IDR 4,200 each); found 54 of 328 weekly conversations unanswered, the basis for an AI sales follow-up with human approval.

Electrical Design Engineer, 3W R&D, PT Dharma Polimetal Tbk

Dec 2021 – 2026

EV product development

- Took the PowerAce TRIEX electric three-wheeler through type approval: prepared the test package (pre-test QC self-assessment, SNI 8872 battery test), filed and paid the second type test in-house and obtained the SUT certificate (Sep 2023).
- Drew the mass-production EV wiring harness (Jul 2024) and revised it in 2025.
- Planned road validation with gradient profiles; passed the 25% slope test at 800 kg and a 270 mm water test, with a 4 h 35 min full charge and 59 km range.

- Compared EV controllers (Votol, Fardriver, Arduino-based) and set up field controller commissioning.

Market analysis alongside engineering (from 2024)

- Wrote the Strategic Renewal proposal (Sep–Dec 2024): two stated-assumption market-sizing scenarios; showed expansion had targeted areas holding ~25% of demand; recommended a Java focus, multi-tier dealers, a digital marketing plan and a central data platform.
- Found that 75.4% of the market leader's units sold in Java (2022–Aug 2024), which shaped the 2025 plan.
- Built a 14-source data register, BPS and Google Trends collection, a regional whitespace score and Power BI dashboards.
- Proposed PowerSync as a Power Platform pilot covering 12 dealer processes and prototyped it in Power Apps (Jan 2025) before the Laravel build.

SKILLS

- **Business analysis:** requirements and traceability, process mapping (AS-IS/TO-BE, BPMN 2.0), UAT, KPI reporting, adoption tracking
- **Data:** Power BI, Excel, SQL/MySQL, Power Apps, public-data collection, market sizing models
- **Digital and AI:** Laravel, Next.js, GA4, Google Tag Manager, Search Console, Meta Ads, OWASP ZAP, CI security scanning, AI-assisted development (Claude Code)
- **Engineering:** EV electrical systems, wiring harness design, motor controller commissioning, vehicle type approval (SUT)

EDUCATION

Diploma III (D3) Mechatronics Engineering, Politeknik Manufaktur Bandung, Indonesia

Google Data Analytics Professional Certificate, Google Career Certificates, 2024
